Advertising: Diet / Weight Loss

Thanks to <u>Middleweb</u> and <u>School Library Journal</u> for recommending this resource.

See also **ADVERTISING**

NEW: <u>Watch</u> our January 10, 2022 media literacy webinar on this subject.

WHAT'S NEW?

In 2023-2024, a number of prescription drugs were unveiled that promised weight loss. And now, those drug messages join traditional weight loss messages all over the airwaves (and online). Here is a sample:

KEY QUOTES

"Testimonials from individuals are not a substitute for science, and that's what Americans need to understand." FTC Chairman Deborah Platt Majoras, quoted in Jan. '07 AP story about FTC fines against weight loss product producers for false/misleading advertising " If you see an ad for a weight-loss product making fantastic claims, keep your money in your pocket," said Lydia Parnes, Director of the FTC's Bureau of Consumer Protection. Source

INTRODUCTION

Did you ever hear the phrase "caveat emptor" ("let the buyer beware")? That's pretty good advice, especially when it comes to the promises made by diet and weight loss advertisers after the new year. Yes, it's that time of year again—for the weight loss ad explosion. Magazines (like these below) in particular feature cover stories on losing weight. And weight loss messaging seems to be everywhere, especially in these new year's publications:

Do your students know how to analyze/read/deconstruct print ads? I have <u>previously written about</u> how to do just that for MiddleWeb.com (a website for middle grades parents and educators.) Here is one worksheet that you might use with your students: it includes some good starting questions for them to consider.

Presented here are some resources, ads, and activities that will encourage young people to use "critical thinking skills" as it relates to these persuasive forms of advertising. Since teaching ad technique and awareness is in most state's health teaching standards, these ads are perfect for use in classroom settings. If you have comments, please send them to me: fbaker1346@gmail.com

BACKGROUND

In early December 2003, the Federal Trade Commission issued new guidelines to the media about accepting advertisements for weight loss products which may be deceptive in their claims. Read how the media covered the story.

FTC Advice issued December 2008: Have some healthy skepticism. Consumers can learn how to spot health scams, such as fake

cancer cures and bogus weight loss products, and do some research on buying generic drugs, Lasik eye surgery, and using dietary supplements. Consumers can learn about rights they may not even know they had — like the right to obtain a copy of prescriptions for eyeglasses or contact lenses at www.ftc.gov/health. (See also the FTC website: Red Flag: Bogus Weight Loss Claims)

Presented below are several ads for educators/parents to consider using. Use of these ads in this context does not imply any deception. Rather I invite educators/parents/students to use media literacy concepts and critical thinking questions and apply them to these ads.

Typical ads for analysis & deconstruction (many located on TV and web pages)

Weighing the evidence in diet ads (FTC)

Online ad for TIMSPA featuring before and after shots of actress/model Anna Nicole Smith.

(I don't know who they're trying to fool, but the picture on the left was obviously taken years earlier)

small print above reads:

*The "546% weight loss" claim is based soley on Zantrex-3's active weight-loss

component. However, Zantrex-3's non-ephedrine, xanthine-based Super Stimulant TM

has been shown to produce additional weight loss in some studies.

+For full study details visit www.Zantrex-3.com

Stop being afraid to step on your scale!

"JumpStart Complete's"

new advanced formula can help
take the fear out of stepping
on your scale.

JumpStart Complete's™ new advanced ephedra-free formula provides natural ingredients to support healthy blood sugar, to support enhanced metabolism, and help burn fat.* JumpStart Complete™ also contains Phase 2™ carb blocker, a clinically proven ingredient that helps keep your body from turning carbohydrates into sugar, which can then turn into fat.*

You wouldn't buy half a shirt, you wouldn't buy half a cookie, don't buy half a diet product. Insist on a complete product that addresses each of your weight loss concerns.

Insist on "JumpStart Complete" TM

Here's what the doctors have to say about JumpStart Complete $^{\mathsf{TM}}$:

- "The most complete weight loss
- Dr. T.R. Shantha MD, Ph.D, F.A.C.A.
- "... gives you the support needed for healthy weight loss."
- Dr. Chris Lewis, D.C

Listen to what our satisfied customers have to say:

- "I lost 8 pounds in the first few weeks on the program, it works!"
- Lisa Miller, Pharmacy Tech
- "JumpStart Complete™ has reduced my appetite. I can push away from the dinner table and I am not hungry later."
- Jed Carter, Attorney
