FRANK's FAVORITE PHOTOS (created June 2023)

To all of my fans who have been asking for a "coffee table" book, HERE IT IS: a large ONLINE collection of images from more than 10 years of doing nature photography. Can you image how much of a challenge it was to go through 10+ years of photos and selecting these? It will become obvious that many of my favorites include shore and wading birds. ENJOY. All images copyrighted. **Copying strictly prohibited.** All images available as prints. Contact me:
